Skills

PHP

Laravel

React

JavaScript

JQuery

MySql

Postgres

Git

Docker

Education

Superior University
Computer Science
2.6
2017-11-01 - 2021-08-01
BSCS

Completed BSCS with esteemed organization, and won CMACED Super Startup Championship in Health and Care Category in Techno Entrepreneurship

Certifications

Enterprise Design Thinking Practitioner
IBM

Enterprise Design Thinking is IBM's approach to solve problems by focusing on users' needs and working as a team to build better solutions.

Web Developer
PSDF

I am certified Web Developer from Punjab Skills Development Fund funded House of Professionals, In this Institute I worked in following skills For Server side PHP, Laravel, For Client Side JavaScript, JQuery, ajax request, Bootstrap,

Awards

Super Startup Championship in Health and Care Category in Techno Entrepreneurship
CMACED

Superior University with CMACED organize competition. where students describe their ideas with demo, I participate as well with my project "Infant Eye Lock" and got first price in Health and Care Category

---

I'm a passionate Laravel developer with over 4+ years of experience in building web applications, REST APIs, and backend systems. I enjoy solving complex problems and turning ideas into clean, efficient code. My work spans across PHP, Laravel, React, and modern tools like Docker and microservices. Whether it's developing a reporting system or working on large-scale backend architecture, I focus on writing scalable code that meets real business needs.

Experience

Developers Studio   **2022-05-01 - Present**
Software Engineer

- Developed backend services and APIs using **Laravel**, **PostgreSQL**, and **MySQL**.
- Worked with **Docker** containers and managed services in a **microservices** architecture.
- Built scalable reporting modules and improved database query performance.
- Collaborated with frontend teams to ensure seamless API integrations.
- Implemented caching and job queues for asynchronous task handling.

Tech Stack: Laravel, Docker, MySQL, PostgreSQL, Microservices

BF Tech   **2021-04-01 - 2022-04-30**
Software Engineer

- Developed full-stack modules using **Laravel** and **React**.
- Built custom admin panels and dashboards with **JavaScript**, **jQuery**, and **Bootstrap**.
- Used **PDO** for secure and dynamic database operations in PHP.
- Designed and integrated APIs for dynamic reporting systems.
- Managed code repositories using Git and followed Agile sprints.

Tech Stack: PHP, Laravel, React, PDO, MySQL, JavaScript, jQuery

Mates Technology   **2020-10-01 - 2021-03-31**
Backed Developer

- Built backend systems using **Core PHP** and custom CMS logic.
- Developed responsive UI components using **JavaScript** and **jQuery**.
- Integrated MySQL databases with optimized query structures.
- Delivered admin dashboards and data forms based on client needs.
- Handled form validation, AJAX calls, and server-side logic.

Tech Stack: PHP, MySQL, JavaScript, jQuery

Projects

Merchant Reports   -
A dynamic accounting platform for customizable data integration, transaction management, and flexible reporting.

Merchant Reports is a dynamic accounting platform that allows users to integrate data sources, manage transactions, apply filters and formulas, generate customizable reports, and modify report designs effortlessly.

Minhaj Digital Encyclopedia   -
Building an Islamic search engine with a React frontend and PHP cURL APIs for seamless Quran, Hadith, and book queries.
🔗 https://mdevr.bftechlab.net

I'm leading the web development and backend APIs for an Islamic content search engine, where users can explore Quran, Hadith, and scholarly books. The website is built in React, while the APIs are crafted in PHP using cURL for seamless data retrieval.

Slough Islamic Trust   -
It's Trust Website where Islamic calender, News, Charity, Blogs, could manage dynamically from Backend. I created Backend of this project in core PHP, with JQuery.
